Clue → answer mapping

1. The muscular organ that pumps blood around the body. → HEART
2. The pair of organs where oxygen enters the blood and carbon dioxide leaves it. → LUNGS
3. The organ inside the skull that supports thinking and coordinates many body functions. → BRAIN
4. The muscular organ that mixes swallowed food with acid and digestive juices. → STOMACH
5. The pair of organs that filter blood and produce urine. → KIDNEYS
6. The large organ that produces bile and processes many substances carried in the blood. → LIVER
7. The organ that covers the outside of the body and forms a protective barrier. → SKIN
8. The hard structures that make up the skeleton. → BONES
9. Tissues that contract to produce movement. → MUSCLES
10. Tough bands of tissue that connect muscles to bones. → TENDONS
